

JOB DESCRIPTION

Job Title	Principal Security Consultant
Status	Full Time
Location	Melbourne, VIC, Australia

Company Overview

Elttam Security Pty Ltd. is a globally recognized, independent information security company renowned for our advanced technical security assessments. Our mission is to adapt to evolving security landscapes while maintaining the highest standards of quality and integrity. By delivering independent, high-quality, research-driven security assessment services, we protect our clients' most valued assets. We remain at the forefront of industry trends through research and development, and support our team members' professional growth through conferences and certifications.

Role Description

Elttam Security Pty Ltd. is looking for a Principal Security Consultant located in or willing to relocate to Melbourne, Victoria.

This position is responsible for performing security auditing and adversarial simulation services for our clients in a principal capacity, as well as producing and delivering high-quality reports detailing and explaining security findings, outcomes, and recommendations.

Key Duties and Responsibilities

As a Principal Security Consultant at elttam, you will:

- Conduct risk and security control assessments.
- Interpret security policy and contribute to the development of standards and guidelines.
- Review information system designs, provide guidance on security strategies to manage identified risks.
- Provide specialist advice.
- Explain systems security and the strengths and weaknesses.
- Perform security auditing and adversarial simulation services for our clients.
- Write comprehensive technical reports detailing and explaining security findings, outcomes, and recommendations.
- Attend and participate in meetings with our clients, including presenting and discussing security findings.

- Contribute to internal research, engineering, and business development activities.

Qualifications

A Bachelor of Engineering, Computer Science, other relevant degree, industry certifications, or equivalent experience is ideal. Candidates should have at least ten years of technical consulting experience.

Skills and Experience

- Demonstrated experience working as a Security Consultant in at least a senior capacity.
- Experience working with clients in various industries, including aviation, automotive, medical, and defense.
- Skills to conduct security-focused source code, network, and design reviews.
- R&D skills to contribute to internal tooling and vulnerability research projects.
- Strong technical writing and verbal communication skills.
- Experience performing embedded device assessments and/or adversarial simulation-style assessments (e.g., red/purple teaming).

Personal Attributes

- Integrity and discretion.
- Maturity, discipline, and self-motivation.
- Passionate about security and technology.
- Attention to detail and commitment to producing high-quality work.
- Committed to self-development through research and engineering.
- Enjoys working both independently and as part of a team.
- Enjoys contributing to and improving the organization.

Application Instructions

To apply, please email your resume and a detailed write-up of your solution to any one of our challenges found on libctf.so to join@elttam.com. Please include "Principal Security Consultant Application" in the subject line.
