

JOB DESCRIPTION

Job Title	Security Consultant
Status	Full Time
Location	Remote

Summary

This position is responsible for performing security auditing and adversarial simulation services for external customers, along with the production and delivery of high-quality reports detailing and explaining security findings, outcomes, and recommendations.

Duties and Responsibilities

As a Security Consultant at elttam, you will:

- Perform security auditing and adversarial simulation services for external customers
- Write comprehensive technical reports detailing and explaining security findings, outcomes, and recommendations
- Attend and participate in meetings with external customers including the presentation and discussion of security findings
- Contribute to internal research, engineering, and business development activities

Qualifications

A Bachelor of Engineering, Computer Science or other relevant industry certifications or experience is ideal, but not necessary.

Skills and Experience

- An understanding of security consulting and the role of a security consultant
- Familiarity with application and network penetration testing
- Familiarity with secure code review
- Familiarity with common tooling such as linux, git, docker, devops, etc.
- Good technical writing and verbal communication skills

Personal Attributes

- Integrity and discretion
- Maturity, discipline, and self-motivation
- Attention to detail and commitment to the production of high-quality work
- Committed to self-development through research and engineering
- Enjoys working both independently and as part of a remote team
- Enjoys helping to improve and build the company they are working in
